

During January, February, and March we received a tremendous amount of rainfall. This has kept me busy opening and closing the flood gates at Lake Wilhelmina. The water level at Lake Wilhelmina has finally gone back down to normal.

I have been feeding rainbow trout and catfish daily.

We have stocked a total of twelve different sites in the past three months. A copy of these stockings is attached.

I assisted with some of the Jim Collins Net Pens catfish stockings.

I assisted with the snakehead eradication for eight days at Brinkley in March.

We are repairing cages and building new cage tops for the cages.

Trash was picked up and hauled off.

Vehicle maintenance and office work was conducted as needed.

The catfish have been eating well this spring. I hope to have some up to size by mid summer for the up-coming derbies and Family and Community stockings.

This is a picture of the spillway at Lake Wilhelmina with the gates open about a foot to keep the lake from flooding. I have opened the gates twelve times in March to keep the lake from flooding...

LAKE WILHELMINA CAGED FISH OPERATION
