1. For the past three years, Arkansas's spring turkey hunting seasons have been 23 days in length. To help increase gobbler carryover and help stabilize turkey numbers and harvest, do you favor the continuation of this conservative season structure?

---

---

---

2. The regular portion of the spring turkey season opened on April 11, 2009. Do you favor a similar opening date (April 10, 2010) to allow more hens to breed before the season opens?

---

---

---

3. The AGFC has proposed creating two new turkey zones on Arkansas lands east of the main channel of the Mississippi River (17A adjacent to Tennessee and 17B adjacent to Mississippi) and to adopt the same turkey season and bag limits as the adjacent state on these lands. Do you favor this proposal?

---

---

---

4. Do you support closing the 2009 fall firearms and 2009-10 fall archery turkey seasons?

---
