Arkansas Game and Fish Commission

Randy Zellers (501)223-6406, e-mail: rdzellers@agfc.state.ar.us**May 20, 2009 Edition**

This is the Arkansas Game and Fish Commission's fishing report for **May 20, 2009**. If there is a body of water you would like included in this report, please call or e-mail us with information on possible sources for that lake or river.

Fishing Tip: When fishing a buzzbait, bend the wire of the lure slightly to the right or left. The buzzbait will curve that direction, enabling you to work it along weed lines and docks easily.

Arkansas River Levels are available at:

http://www.swl-wc.usace.army.mil/WCDS/Reports/Daily/Pao_rvrs.txt

White River Levels are available at:

http://www.srh.noaa.gov/lmrfc/forecast/tributaries/status_white.shtml

Statewide Family and Community Fishing Report: Catfish are in Community fishing ponds statewide. Nightcrawlers fished just off the bottom on a slip cork or on bottom with a bell sinker are working well. Many of the ponds are full of bream as well. Crickets fished under a bobber will catch plenty of bream. For more stocking information, call the Hotline at 1-866-540-FISH (3474) toll-free.

[Central Arkansas](#)
[North Arkansas](#)
[Northwest Arkansas](#)

[Northeast Arkansas](#)
[Southeast Arkansas](#)
[South Central Arkansas](#)

[Southwest Arkansas](#)
[West-Central Arkansas](#)
[East Arkansas](#)

CENTRAL ARKANSAS**Lake Conway:**

Bates Field and Stream (501-470-1846) said the water is dingy and high. A few bream are being caught near the bank on wax worms, tinsel teasers and crickets. Crappie are not doing so well, but are biting near cypress trees on minnows. Bass are doing well on black/red worms and spinnerbaits. Catfishing is picking up on trotlines baited with small bream and minnows.

Dan at Gold Creek Landing said bluegill and red-eared sunfish are biting well on crickets. Bass are biting well on plastics fished in the pads and at the edges of channels. Crappie are fair around cypress trees in 5 feet of water. Catfishing is good on trotlines baited with bream.

Little Red River:

Lindsey's Resort (501-302-3139) said the fishing is great with the water being clear and down with no units running. Trout are biting well on Power Bait, plugs and nightcrawlers. Fly-fisherman are doing well since the water level is low.

Jed Hollan at the **Little Red Fly Shop** said the Corps of Engineers has been releasing water every day from 6 a.m. until 10 p.m., using one generator for 8 hours and kicking in the second unit for 8 hours. Wade fishing at Winkley Shoal is possible from 6 a.m. to about 9 a.m. and until 11 a.m. at Libby Shoal. The hatches continue unabated with caddis, BWO, March brown, midge and sulphurs coming off most every day. The best dry flies to try include midge (size 22; cream), para adams (size 18), elk hair caddis (sizes 14-18; tan), blue-winged olive (size 18), para sulphur (size 18) or crackleback (size 12). Productive sub-surface flies to try include sowbug (sizes 14-16; tan, smoky olive, UV tan, UV light gray or peacock), chronic (size 14), zebra midge (sizes 16-22; red, copper or black), green or red butt soft hackle (sizes 14-18), copper john (sizes 14-16; green or red) or woolly bugger (sizes 8-12; olive, brown or black).

Greers Ferry:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 470.70 feet MSL.

Tommy Cauley of Fish Finder Guide Service said hybrids and whites are coming up in places all over the lake and some can even still be caught upriver. The lake is at 470.65 and falling. Bass are biting well on swim baits, wake baits and soft plastics fished around flooded cover. The old brush line and secondary points also are working well. Catfishing is good on live and prepared baits near cover, but you need stout line to get them out of the brush. Walleye are biting in front of the old brush line on hard bottoms as well as secondary and main lake points. Bream are bedding and fishing for them is excellent in the shallows.

Shiloh Marina (501-825-6237) said the water is clear and up about 10 feet. The bream are biting well, and the bass are doing fairly well on live bait. There is no report on crappie or catfish.

Harris Brake Lake:

Coffee Creek Landing (501-889-2745) had no report.

Lake Overcup:

Lakeview Landing (501-354-1470) said the water is murky and back to normal level. Bream are biting well on minnows and crickets. Crappie are still slow. There is no report on bass. Catfishing is good on crickets and large minnows.

Overcup Landing (501-354-9007) said the water is about a foot high and dingy. Bream are biting well on wax worms and crickets. Crappie are biting fairly well in 8-10 feet of water on pink and white/chartreuse jigs. Bass are fair on spinnerbaits and black soft-plastic worms. Catfishing is fair on nightcrawlers.

Brewer Lake:

Overcup Landing (501-354-9007) said the water is high and clear. Bream are biting well near the bank on redworms and crickets. Crappie are biting well on small minnows. Bass are doing well near the brush on white/chartreuse and black spinnerbaits and buzzbaits. Catfishing is fair on nightcrawlers and shad.

Lake Maumelle:

Jolly Rogers Marina said the average surface water temperature is 73 degrees. Black bass have moved off the beds to deeper water (6 to 12 feet) and are hitting deep-running crank baits, spinner baits and jigs. Kentucky Bass are hitting in water from 6 to 14 feet deep and are being caught on jigs deep and crank baits that go deeper. White bass are schooling around the chimney and hitting on CC Spoons, clear Near Nuttings and Rogues. Crappie are being caught about 15 to 20 feet deep. Movement is to deeper water on minnows and 1/32 ounce jigs. Bream are moving around the docks and in shallow areas. The break water at the marina is proving good catches now. Bream are being caught on worms and crickets. Saugeye are 10 to 15 feet deep and are hitting Roadrunners and jigs and should start running on the west end of the lake. Catfish are from 8 to 15 feet deep and hitting minnows, worms and prepared baits.

Hatchet Jack's Sport Shop (501-758-4958) said the water is high and clear. Bream are biting well on crickets. Crappie are biting well on minnows. Bass are biting well on crankbaits. Catfish are good on cut shad and skip jack.

Lake Valencia:

Hatchet Jack's Sport Shop (501-758-4958) said the water is high and stained. Bream are biting well on crickets. Crappie are biting minnows. Bass are biting on minnows. Catfishing is good on nightcrawlers and package bait.

Sunset Lake:

Turbyfill's Outdoor Sports (501-315-3061) said the water is normal and stained. Bream are biting well in the shallow water on crickets. Crappie are slow. Bass are biting well on top-water lures and shad-colored soft plastics. Catfish are biting well on chicken liver and Magic Bait.

Saline River Access in Benton:

Turbyfill's Outdoor Sports (501-315-3061) said the water is normal with a little color. Bream are biting well on black/brown Rooster Tails and live bait. Crappie are fair on 2-inch grub worms. Bass are biting well on white/chartreuse spinnerbaits. Catfishing is good in the shallows on Magic Bait and shad.

Arkansas River at Morrilton:

Charley's Hidden Harbor in Oppelo said the river is flowing around 140,000 cubic feet per second, but falling steadily. Bream are in the backwaters such as Copper's Gap, Flag and Lake Cutoff and are hitting crickets. Kentucky bass are on the inside of jetties near rock breaks. Fish from the upstream side using a spinner bait near the break. Catfish are trying to spawn in calm areas in the river. Nightcrawlers are working well for catfish. Black bass can be found in schools of shad. Pork rinds are working well. Bailey Lake on Petit Jean Mountain has been the hot spot for bream.

Arkansas River at Little Rock:

Vince Miller from **Fish N' Stuff** (501-834-5733) said the water is high and muddy. Some anglers are catching a few bass in the backwater areas. The catfishing is good off the banks near the hydro plant using live bait.

Hatchet Jack's Sport Shop said the water is high and murky. At Burns Park, bream are biting on redworms and crickets. Crappie are biting fairly well on minnows. Bass are slow but biting plastics. At Fourche La Fave bream are biting redworms and crickets. Not a lot to report on crappie, some are biting on red/chartreuse jigs and minnows. Bass are biting well at the Little Maumelle River, Fourche La Fave and Fourche Creek on white spinnerbaits and pearl crankbaits. At Big Maumelle Creek, bass seem to be biting better on red or blue soft-plastic worms. Catfishing is excellent on nightcrawlers and shad throughout the river.

McSwain Sports Center (501-945-2471) said water is high and muddy and nothing to report at Terry Lock and Dam.

Clear Lake:

McSwain Sports Center (501-945-2471) said the water is high and muddy. Bream are biting well in 1-2 feet of water on crickets. A few crappie are being caught on minnows. Catfishing is good on nightcrawlers.

Peckerwood Lake:

Herman's Landing (870-241-3731) said water is dingy but clearing. Bass and crappie are very slow. Bream are biting well on crickets. Catfishing is very good on minnows and worms.

Pickthorne Lake:

Hatchet Jack's Sport Shop (501-758-4958) said the bream are good on crickets and redworms. Crappie are biting well on minnows. Bass are biting well on plastics. Catfishing is excellent on nightcrawlers and large minnows.

NORTH ARKANSAS

White River:

John Berry from **Berry Brothers Guide Service** said with all the rain and rising water, the pattern on the White

was for round-the-clock generation of moderate flows. This has created some excellent conditions for drift fishing. The catch-and-release section below Bull Shoals Dam has been a bit spotty. One day is excellent and the next is very slow. Anglers reported success on midge patterns. The most effective were zebra midges in black with silver wire and silver beads and red with silver wire and silver beads. The best sizes were 14-16. Wildcat Shoals has been another hotspot. Anglers have reported great success during lower flows. The hot flies have been soft hackles. Try green butts, partridge and orange soft hackles and partridge and green soft hackles. An olive woolly buggler on a sink tip has also been quite effective. Rim Shoals has fished well. There are still some caddis coming off and there is some top-water activity near the banks. This requires an accurate cast and a good drift. Several anglers have had great success with green caddis larva ticked along the bottom under an indicator.

Sportsman's White River Resort (870-453-2424) said the water is clear with two to three generators running all week, keeping the water down. Fishing is great, especially fly-fishing. They are using woolly buggers, zebra midges and copper johns.

White River (From Buffalo Shoals to Norfolk):

Jim Brentlinger at [Linger's Guide Service and Fishing Lodge](#) (870-499-5185) said the water has been very muddy. Even with the colored water, you can catch fish on hot pink glo-worms on a drift rig and tip your hook with white Power Bait. The fishing will be back to normal before the weekend unless we get more rain.

Crooked Creek:

John Berry of [Berry Brothers Guide Service](#) said the seemingly endless rains have left Crooked Creek and the Buffalo River high and muddy. It will take a while for them to clear.

Bull Shoals Lake:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 669.30 feet MSL.

Bob Pauletti (870-656-3350) with [Bull Shoals Lake Boat Dock](#) had no report.

Lake Norfolk:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 560.88 feet MSL.

101 Grocery and Bait said the water surface temperature is in the mid to upper 60s and the water is stained. Fishing has been good during the last few weeks. Stripers are hitting top-water baits in the morning and evenings. Crappie fishing is good, not all of them have spawned yet and they are being caught at varying depths (3-25 feet deep). Bass fishing is good on jigs, spinnerbaits and soft-plastics. Some monster bluegills are hitting minnows, worms and crickets. Catfishing is fair. White Bass fishing is fair. Walleye fishing is good using live bait and crankbaits around 18 feet deep along secondary points. Smallmouth bass fishing is good using small soft-plastics on a 3/16-oz. jig.

Norfolk Tailwater:

John Berry from [Berry Brothers Guide Service](#) said generation on the Norfolk has been very limited, which has created some excellent wading. The Corps of Engineers has been holding back water to relieve flooding downstream. When that flooding abates, we can expect some much higher levels of generation. Fishing remains slow. There has been little generation recently and it has been pounded with near constant pressure. If you are fishing Quarry Park the hot fly has been the sowbug. On the lower river, zebra midges in black with silver wire and silver bead (size 18) and red micro worms (size 18) have been the go-to flies. There are still a few caddis out. Here again the presentation of your elk hair caddis must be flawless. Dry Run Creek continues to fish well. There is little room to cast here so you should keep your line short. The hot fly is the sowbug and the San Juan worm in red.

Jim Brentlinger at [Linger's Guide Service and Fishing Lodge](#) (870-499-5185) said the water is muddy with back up water from the White River. It will clear up as soon as some generation comes through to push out the muddy water. There have still been quite a few fish caught below the catch-and-release area on Power Bait and worms. Cast out and drag your bait back like you are working a plastic worm in the lake for bass. This works good when there is no generation.

NORTHWEST ARKANSAS

Beaver Lake:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 1,129.12 feet MSL.

JT's Crappie Guide Service (479-640-3980) said bass fishing has been fair. Try using Texas-rigged tubes or lizards around flooded cover. Crappie fishing has been tough. Try fishing a minnow along standing timber in the back half of coves and along bluff walls with standing timber. The crappie have been suspended 10 to 15 feet deep. White bass are schooling in open water on main lake flats early and late. Try casting shad-imitating baits directly into a feeding school. Bluegill are biting well close to the bank on crickets fished 1 to 4 feet deep.

Southtown Sporting Goods (479-443-7148) said the water is high and muddy. Bluegill are coming out and biting on crickets. Nothing has been heard on crappie. Bass are slow but there have been a few white bass and stripers caught in the river arms. Catfishing is very good on live bait and jug lines.

Beaver Tailwaters:

Ken Richards at **Just Fishing Guides** had no report.

Lake Fayetteville:

Lake Fayetteville Boat Dock (479-444-3476) said the water is normal and murky. A few bluegill have been caught on crickets and worms. Crappie, bass, and catfish are slow.

Lake Sequoyah:

Lake Sequoyah Boat Dock (479-444-3475) said the water about two feet above normal and dingy. Bream are biting well on worms and crickets, but water is still too cool for them to bed up. Crappie are biting well in the shallow water around tree tops on minnows and Road Runners. Bass are biting fairly well in 1-3 feet of water on plastic worms and buzzbaits. Catfishing is good in 8-10 foot of water on chicken liver and shad.

NORTHEAST ARKANSAS

Henry Gray Hurricane Lake WMA:

Judy Potts of Judy's Bait Shoppe at the North entrance to Henry Gray Hurricane Lake WMA reports that the WMA is still flooded, but the water is starting to go down slowly. A few trotliners are boating back to Hurricane Lake and Honey Lake. They are catching plenty of crappie and bass for their effort. The White River stage is still projected to be above 30 feet until May 25.

Lake Charles:

Lake Charles State Park (870-878-6595) had no report.

Crown Lake:

Boxhound Marina (870-670-4496) said the water is normal and clear. Bream are biting well on redworms. Crappie are slow. Bass are biting well on flukes and trick worms. Catfishing is good on nightcrawlers and chicken liver.

Lake Frierson:

Lake Frierson State Park said the water is cloudy and high. There is nothing to report on bream or bass. Crappie were biting well on minnows. Some flatheads and blue catfish have been caught on minnows and nightcrawlers.

Spring River:

Mark Crawford at **Spring River Fly Shop** said rains have muddied the Warm Fork and raised water levels, but the Spring is still running clear. The Warm Fork is a small creek that runs into the Spring River at Dam 1. When it runs muddy and the Spring remains clear it usually takes about a day to clear up. Modified San Juan worms did very well Sunday morning.

SOUTHEAST ARKANSAS

Lake Chicot:

Lakeshore Motel and Marina (870-265-9901) said the water is falling, but is still about a foot high. Bream are beginning to bed up and are biting well on crickets. Catfish are biting very well on minnows, nightcrawlers and

shad. Bass and crappie are slow.

Lake Monticello:

Fishing guide Greg Gullede (870-723-3928) of MonticelloBigBass.com said recent rains have Lake Monticello well above normal, but the fish keep biting. The bass are fired up. Many bass are in the shallows, but most of them have spawned. Cruising fish can be caught on frogs, flukes and senkos. The live bait bite is still going with shiners. There are some giant red-eared sunfish coming out of the lake right now. Jigs, crickets and red worms are working excellently. Many bream over a pound each have been caught. If anyone has pictures, videos, or fishing reports, please send them to us at info@monticellobigbass.com.

SOUTHWEST ARKANSAS

Millwood Lake:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 270.2 feet MSL.

Millwood Lake Guide Service said the water is 12.2 feet high and the only ramps open are at Yarborough and Jack's Isle. All Corps of Engineers ramps and state park ramps are closed, as are the campgrounds. Navigating the lake right now is nothing short of treacherous. The lake is full of floating logs and debris and the current at the dam is more than 60,000 cfs. Visibility has been reduced to nearly zero everywhere in the lake. Bass should be in postspawn patterns and should bite fairly well around newly flooded areas on Red Coach Dog and Millwood Magic Rat-L-Traps. Hot mouse-colored War Eagle spinnerbaits should work as well. Crappie have shut down with the rising, muddy water. Catfishing should be excellent on cut bait and stink bait fished near moderate current.

White Oak Lake:

Local angler John Tilley said fishing was just getting hot and the rains came. Catfishing is excellent on trotlines and jugs set near channels and spawning areas. Bream also were biting well on redworms and crickets. Bass were still being caught shallow on crankbaits and jerkbaits. The lake level as of Monday was about 2 feet over normal.

Lake Greeson:

Darryl Morris of **Family Fishing Trips Guide Service** said the lake is 15 feet over flood stage at 563.18msl and falling slowly. Water has been going over the dam spillway since May 15, which hasn't happened since 1968. Reports have been made that bass are being caught in the back of secondary creek arms. Crappie and bream can be caught over flooded laydowns and buck brush. If you run a small boat, you can get into the standing timber in the backs of the flooded coves.

DeGray Lake:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 415.2 feet MSL.

Local angler George Graves said the water surface temperature is in the low 70s. The water is slightly stained in the lower end and muddy above Arlie Moore. Only two boat ramps are open. The Corps ramp across from the Iron Mountain Marina and the State Park ramp. Not many anglers are fishing due to the high water and limited lake access. Those who are fishing are reporting good catches of bass. The fish are moving out of the trees and are biting well in small coves and ditches on the main lake on green pumpkin Texas-rigged worms, Brush Hogs and jigs. A few big Kentuckies are being taken off main lake rocky points on spinnerbaits. Many bream and catfish have been caught from the bank around DeGray State Park on worms.

DeGray One Stop (501-865-3511) said the water is high and muddy. Most boat ramps have been closed all week. No report.

WEST-CENTRAL ARKANSAS

Lake Dardanelle:

Regina Olson at **Spadra Marina** said the river has slowed somewhat at the upper end of the lake, making it possible to fish some of the backwaters. White bass have been running and surface feeding like crazy at the upper end of the lake. Largemouth bass have been slow to fair. Crappie are fair on minnows fished 4 feet deep. Catfishing is excellent on prepared baits and live shad.

Murphy's Sporting Goods (479-229-3200) said the water is extremely muddy and high. The water flow is 230,000

Blue Mountain Lake:

Teresa at CD's Quick Stop (479-947-2178) said the water is high and muddy. Nothing has been heard and not much to report.

Ozark Pool:

Lakeside Food Mart (479-667-5155) said the water is muddy and high. Bream are biting fairly well on crickets and nightcrawlers. Crappie are slow on minnows and jigs. Catfishing was good on cut bait, shad and nightcrawlers. Black bass are fair on crankbaits and jigs in the backwater.

Lake Ouachita:

As of Tuesday, the U.S. Army Corps of Engineers reports the lake's elevation at 587.3 feet MSL.

Larry Hurley from [Poorman's Guide Service](#) had no report.

[Mountain Harbor Resort](#) said the water is very high and stained. The water temperature is between 68-72 degrees. Largemouth bass are biting well on shad baits and flukes fished on main and secondary points. Yum Dingers and floating worms are very effective right now fished in coves or around shoreline brush. Top-water action has slowed, but is still good. Zara Pups and Spooks, Rooster Tails and Boy Howdies will make for a fun day on the water. Walleye are fair and still being caught on crankbaits and jerk baits on main-lake points near brush. Green grubs and finesse worms are producing a few fish as well. Stripers are good on live shad and trotline minnows. Top-water action is good with C-10 Redfins. Bream are excellent with worms or crickets in 6 to 12 feet of water. Crappie are fair near brush in 10 to 20 feet of water. Minnows or crappie grubs are still working best. Catfish are excellent on cut bait and live bait on jug lines and trotlines.

[Trader Bill's Outdoor Sports](#) had no report due to high water.

Dave Lindhag from [Striped Bass Adventures](#) had no report.

Lake Hamilton:

[Trader Bill's Outdoor Sports](#) said the lake is full, and the surface temperature is in the mid-70s. The water is muddy from recent rain and there are many floating logs and debris in the lake. A Carolina-rigged lizard or creature bait is working well on primary ledges and main-lake points. Wacky-rigged floating worms are working fairly well in the guts of pockets. White bass are schooling in the middle of the creeks on the surface.

Lake Catherine:

Shane Goodner, owner of [Catch'em All Guide Service](#), reports that the Carpenter Dam tailwater is clearing but still stained and moving fast. Heavy generation is the norm and will continue until Lake Ouachita is out of flood pool. Fishing has been limited, but some anglers are still catching fish. Rainbow trout fishing is very poor in the fast, muddy waters, but will improve as the water clears and slows. Areas that hold clearer water and are protected from the current have given up a few trout on nightcrawlers and wax worms fished just off the bottom. Brightly colored Rooster Tails and small crankbaits have taken some rainbows, but the bite is inconsistent. The majority of the crappie and white bass spawn is over, but many fish of both species are in the tailrace and are feeding heavily and resting before they migrate downstream. White and gray jigs cast around visible rock structure are working fairly well. Mid-May always marks the beginning of schooling striper action below the dam. Threadfin shad schools move toward the cooler shallows and the stripers follow. Casting large top-water baits such as trout-colored C-10 Redfins and Super Spooks are highly productive.

Lake Hinkle:

Bill's Bait Shop (479-637-4719) said water is clear and high. Bream are biting well on crickets and worms. Crappie are biting well on minnows and pink/white or chartreuse/red jigs. Bass are biting well on spinnerbaits. Catfishing is good using trotlines with chicken liver and shiners.

Lake Atkins:

Lucky Landing (479-641-7615) said the water is normal and murky. The bream are biting well on worms and crickets. No report on crappie or bass. Catfishing is good on large minnows and cut bait.

SOUTH CENTRAL ARKANSAS

Moro Bay:

Moro Bay State Park at the junction of the Ouachita River, Raymond Lake and Moro Bay said the river is at 88.0 feet MSL (23 feet above normal). It reached 88.8 feet last Thursday, the third highest crest on record. The water level is falling very slowly. Rod-and-reel fishing of all kinds is difficult and water conditions are unsafe in the river for boating. The state park is closed. To stay updated on when conditions will return to normal you can check out the National Weather Service Web site at: www.srh.noaa.gov/lzkl/.

Tri-County Lake:

The water is beginning to drop. Some anglers have made it to the water and are doing well on bass. Fishing is slow at first, but picks up at around mid-morning. Shallow crankbaits, finesse worms and top-water frogs are working well around any growing moss.

Ouachita River Oxbows:

High water continued to slow fishing last week.

EAST ARKANSAS

Arkansas River at Pine Bluff:

The Tackle Box (870-534-1498) said the water is high and muddy. Bream are biting well on wax worms and crickets. Crappie and bass are slow. Catfishing is good on worms, cut bait and skip jack.

White River:

Triangle Sports (870-793-7122) had no report.

Maddox Bay:

Maddox Bay Landing (870-462-8317) said the water is high and dingy. There is nothing to report on bream, crappie, or bass. Catfishing is good using a trotline with minnows.

Bear Creek Lake:

Arkansas Outdoors (870-295-4240) said the water is clear and about normal. The bream are biting well on worms and crickets. No report on crappie, bass or catfish.

Island 40 Chute:

Daily's Boat Dock (870-739-3478) said the water is high and clear. No fishing to report

Horseshoe Lake:

Local angler Clyde Gregory said the water is clear and high. Bream are biting well on redworms and crickets. Crappie are biting very well on black/chartreuse jigs and minnows in shallow water. Some bass have been caught on spinnerbaits, but it's slow. Catfishing is very good on cut bait in shallow water.
